

Optimize Your Velocity as the Automotive Industry Evolves

The automotive field has changed dramatically in recent years, with smart technology's integration into innumerable areas of daily life. Vehicles today are as connected as mobile devices—and require component support to match.

How We Help

Navigate

shortage challenges when components are in hot demand

Explore

dynamic procurement support, from lifecycle management to cost savings

Get ahead

of disruptions with proactive inventory-management models

Confirm

components' authenticity and quality with Smith's certified laboratories and processes

What We Do

Every facet of vehicle construction matters, from safety to newly integrated conveniences that augment the driver and passenger experience. Smith will support your build to the level of each vital component.

Expert Support for Shortage Situations

The combination of exponential tech advances with widescale global disruption has made shortages a dire challenge in the automotive and other supply chains. Smith is specialized in navigating shortages and other disruption situations to remain agile no matter what the market brings—and to keep our partners just as agile.

Customizable Procurement Support

Smith's comprehensive procurement support goes beyond shortage sourcing and can support any situation or need. From proactive obsolescence and lifecycle-management support to help with supplier consolidation or cost savings, Smith can work with you to build unique sourcing programs that fit your requirements while delivering the parts you need.

Quality and Safety

Modern vehicles are fine-tuned systems engineered to function precisely and protect everyone on the road with ever-evolving capabilities and features. Each component that supports these functions is vital. Smith's best-in-class, global quality laboratories confirm and safeguard component functionality and authenticity to the most rigorous standards.

Adaptable Inventory Management

While sourcing the parts you need now is crucial, we can help you take the next step in building out models for ongoing procurement and inventory management to save you time and effort through future market shifts and upheavals. From large-scale VMI programs to excess-inventory solutions, we'll help craft a custom solution ideal for your needs.

The automotive industry shows no signs of slowing down as innovations in performance, experience, and connectivity speed forward. Partner with Smith, and we'll help you stay at the forefront.

Certifications and Qualifications

Our focus on quality is backed by third-party certifications and industry affiliations. As a leader in our industry, we believe in not only meeting but exceeding industry standards for quality. We actively maintain certification requirements and reach beyond those standards to promote the highest level of quality in our products and services.
