

# IT solutions to transform your organization

Create compelling, digitally enabled user experiences with a modern technology infrastructure from Spectrum Enterprise®. Our full portfolio of connectivity and communications solutions deliver scalable performance and reliability that has the power to transform your organization.

## Internet

Empower your organization with reliable connectivity on a dedicated, high-performance fiber network.

**Dedicated Fiber Internet:** Achieve dedicated internet connectivity with symmetrical upload and download speeds and bandwidth up to 100 Gbps.

**Secure Dedicated Fiber Internet:** Connect with confidence when you integrate fast, dependable, dedicated fiber internet service with enterprise-level cybersecurity protection in one, affordable and remarkably simple solution.

**Wireless Internet:** Provide temporary or secondary internet access over 4G or 5G LTE Advanced technology with this all-inclusive wireless internet service.

## Networking

An easier way to reliably connect your locations with complete end-to-end support.

**Ethernet Services:** Meet ever-growing data needs by connecting locations with a fast, reliable wide area network (WAN) solution backed by performance guarantees and built on a dedicated fiber infrastructure. Bandwidth up to 100 Gbps is available.

**Cloud Connect:** Extend your network with fast, secure and dependable private connections to cloud service providers.

**Wavelength Services:** Support your most demanding application needs with high-speed, dedicated WAN connectivity with bandwidth up to 100 Gbps.

## Managed services

Transform your network and simplify IT operations with expertise, service and support.

**Enterprise Network Edge:** Improve the network experience for your teams with an enterprise-grade managed solution that brings together connectivity, equipment and network management to support both hybrid networks and workforces. Powered by Fortinet, the solution simplifies IT operations by providing networking with security features and optional integrated WiFi and switching in a multi-cloud-ready platform.

**Managed Network Edge:** Simplify the deployment and management of your network with this modular, all-in-one solution. Delivered over the Cisco Meraki platform, Managed Network Edge offers security features, routing, SD-WAN, WiFi, switching, smart cameras, environmental sensors and the ability to work from anywhere there is an internet connection. Achieve flexibility, scalability with connectivity, equipment and network management from a single partner.

**Managed Router Service:** Efficiently route traffic and improve bandwidth use without investing in hardware or day-to-day management.

**Managed WiFi:** Meet customer demands for reliable connections to the internet with ubiquitous coverage across your facilities.

## Voice and collaboration

Inspire the free flow of ideas and anywhere, anytime productivity with reliable, digital voice solutions.

**Unified communications:** We offer flexible, integrated and fully managed communications and collaboration tools that adapt to accommodate any work environment. We have partnered with industry leaders RingCentral and Webex to deliver seamless experiences for your teams in the office, while working remotely or on the go. These cloud-based solutions combine video and audio conferencing, messaging, file sharing and easy integration with third-party apps that make your teams more productive.

**Hosted Call Center:** Create reliable, consistent client interactions with the ability to scale to meet evolving needs and support call center operations with robust analytics, reporting and CRM integration.

**Enterprise Trunking:** Maximize the value of premises-based PBXs with reliable, cost-effective, feature-rich and easy-to-scale PRI and SIP trunking solutions.

## Security

Strengthen your security posture with automated updates that easily keep pace emerging security risks.

**Advanced security:** We work with leading providers like Cisco and Fortinet to protect your network with advanced security capabilities across all your locations. Our security services include firewalls, unified threat management (UTM), URL content filtering, advanced malware and intrusion protection backed by 24/7/365 monitoring and automatic updates.

**DDoS Protection:** Guard against malicious volumetric attacks designed to overload your network with world-class distributed denial of service (DDoS) threat identification and mitigation.

## TV

Deliver superior experiences with quality HDTV entertainment and access to information.

**Set Back Box TV:** Provide a reliable and homelike TV viewing experience that improves loyalty, satisfaction and entertainment through a large variety of channel lineups, premium packages, digital signage and on-demand content.

## The right partner for your digital journey

Digital transformation is reinventing almost all aspects of our lives. To anticipate and maximize new opportunities requires a technology partner that can fully support you every step of the way. Spectrum Enterprise has vast expertise, successfully guiding organizations throughout their digital journey.

We know the limitless possibilities that our technology solutions can bring to your organization. We are committed to partnering closely with you to understand your unique needs, create solutions to help reach your goals and be there for you when
